Video Memory Packages:

Video brings out the emotions in a way that no other medium can. We offer quality coverage using HD digital equipment and wireless microphones, so the picture and the sound quality is far superior to home video. Our two camera coverage adds an even more professional dimension to your wedding. We video the ceremony and other important parts of your day from start to finish and you receive a DVD of those events. Plus our packages include a highlight video using cinematic/filming techniques with background music, voice overs from important family members, and editing to tell the story of your special day that can't be captured or portrayed any other way.
